1.2 Heading, a long one, just to show what will happen, if the text will reach the next row

How to set icons **A** in text flow.

Another hand made table, and like the table above, also here the rounded rectangle as well as the text box has to get re-formatted after the translation.
(The indent at the beginning of this row is made by entering 1 blank.)

1. Numbered list with icons **A**, which will be kept on the text position if this will chage.
